SECTION 6 - ACCIDENTAL RELEASE MEASURES				

 Personal precautions:
 Keep away from heat, sparks and open flame. Provide sufficient ventilation, use explosion-proof exhaust ventilation equipment or wear suitable respiratory protective equipment. Prevent contact with skin or eyes (see section 8).

 Environmental Precautions:
 Prevent product or liquids contaminated with product from entering sewers, drains, soil or open water course.

 Methods for Cleaning up:
 Clean up with sand or other inert absorbent material. Transfer to a closable steel vessel.

 Materials not to be used for clean up:
 Aluminium or plastic containers

SECTION 5 – FIREFIGHTING MEASURES

SECTION 7 – HANDLING AND STORAG

Handling: Storage: Avoid breathing of vapor, avoid contact with eyes, skin and clothing. Keep away from ignition sources, use only electrically grounded handling equipment and ensure adequate ventilation/fume exhaust hoods. Do not eat, drink or smoke while handling.

Store in ventilated room or shade below 44°C (110°F) and away from direct sunlight. Keep away from ignition sources and incompatible materials: caustics, ammonia, inorganic acids, chlorinated compounds, strong oxidizers and isocyanates. Follow all precautionary information on container label, product bulletins and solvent cementing literature.

 Skill Protection:
 Prevent contact with the skill as much as possible. Buty hubber gives should be used for nequent inmersion. Use of solvent-resistant gloves or solvent-resistant barrier cream should provide adequate protection when normal adhesive application practices and procedures are used for making structural bonds.

 Respiratory Protection:
 Prevent inhalation of the solvents. Use in a well-ventilated room. Open doors and/or windows to ensure airflow and air changes. Use

rotection: Prevent inhalation of the solvents. Use in a well-ventilated room. Open doors and/or windows to ensure airflow and air changes. Use local exhaust ventilation to remove airborne contaminants from employee breathing zone and to keep contaminants below levels listed above. With normal use, the Exposure Limit Value will not usually be reached. When limits approached, use respiratory protection equipment.

SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

Appearance:	Orange, regular syrupy liquid
